

NC_044056.1

[illegible]

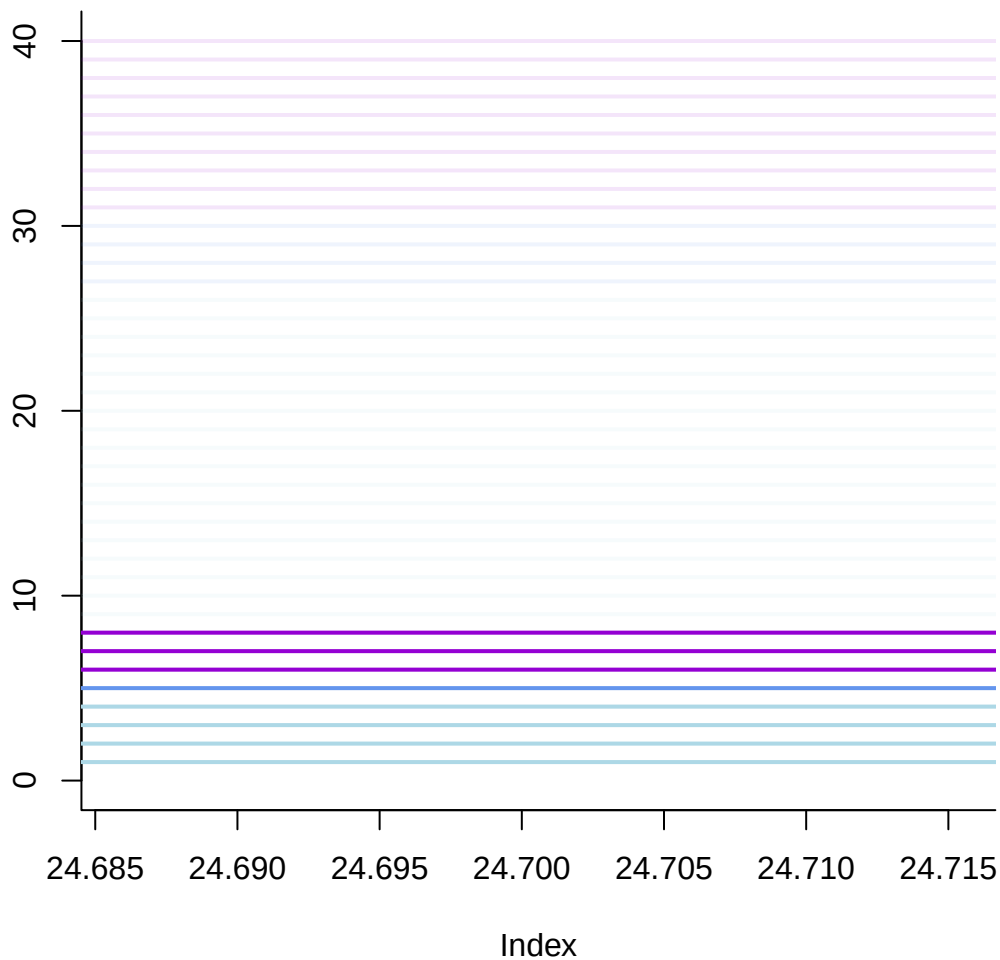

Genomic coordinates (24,686 to 24,713) are listed on the left and right sides of the heatmap. The data is organized into a grid of 24,713 rows and 24,713 columns. The heatmap shows a complex pattern of high and low intensity values, with a prominent diagonal band of high intensity (red) running from the top-left to the bottom-right. There are also several horizontal and vertical bands of high intensity, suggesting regions of high similarity or conservation. The overall pattern is highly structured and repetitive, characteristic of genomic data.
